The unique technique which is used in this app is called a Macro. This takes two information from previous step of the application. And an information which can be saved to file. For example you can change name of a place or transition and when you want to export all information as xml or pnml files then you have to save information of that place in that file. Please Note : 1) Macros are used in Place and transition. So Place must be created first. Welcome to the project management world. It's a universe filled with tools, methods, and vendors that will make or break your project. So, what do you really need? What are the best options? And when does someone finally say: This is too much. This is too complicated, I'll just do it myself. The goal is to provide the most stable set of software and solution for project management and task management. What is the key to the success of this project is that it is also a serious app to manage all kind of projects such as scientific projects, office projects, family projects and also construction projects. The project management system it is not only a simple task management tool. The

system has been created in mind with the whole lifecycle of any project in mind. The user is also able to keep a checklist of to do tasks, milestones, and issues. The most important is the relationship between projects. This project management system has a fluid view on a project. If you open a project, you will see the sub projects that your project consists of. The project has many sub projects. These are what make the project more stable. It is also easy to transfer data between projects. There is a free basic version of this project management system. The free version can have no more than 5 projects. There is a fully version with all functions and no restrictions. The fully version can have unlimited projects, unlimited sub projects. There is a professional version. With a full function that is better than the basic version. If you like this project management system, please go to support@myprojectmanager.org and give us a feedback about the program.
