NOTE: The Xilinx software license activation link is valid for one Xilinx ESXi version only. . You are using an early version of the Vivado 2020

[Download](#)

A: Installing the license file does not install the design, but rather only creates a license file (which your license server can see) and allows you to run the software without an active license. If you remove that license file, you can run the software again (you won't be asked for the license key). If you forget to remove the license file after installing, then you might have to delete the license file manually (look for xilinx.lic.txt) from the Vivado installation directory. If you have installed multiple licenses (in my case several months ago), and forget to remove the old license, then you might need to uninstall Vivado and reinstall the software. Uninstall Note that you can uninstall Vivado using the GUI (from the "Applications" menu or from the "Help" menu) or by running the uninstall program: UNINSTALL.EXE Vivado Xilinx License Crack Software A: As mentioned in one of the comments: If you forget to

remove the license file after installing, then you might have to delete the license file manually (look for xilinx.lic.txt) from the Vivado installation directory. If you installed multiple licenses (in my case several months ago), and forget to remove the old license, then you might need to uninstall Vivado and reinstall the software. Another option is the command line. As mentioned by other users: You'll need your license server's password (the one you provided to get the license), and xilinx.lic.txt. Check if you have this file in your Vivado installation: C:\Program Files\Xilinx\Xilinx ISE 2017.2\ISE2017.2\License\xilinx.lic.txt If so, delete it To check your license server's password, this may help: Read Section 13.4 - Obtaining the Server's Password For the xilinx.lic.txt file, locate this path: C:\Program Files\Xilinx\Xilinx ISE 2017.2\ d4474df7b8
