... How do you know? Are there commercials? I don't remember any Happy Wheels commercials. I know they've been a long time coming, and I hope you're happy with the result. This game is the result of much, much hard work. Now, let's talk about how it came to be. . . . The game was originally conceived when the Xbox was young. . . . That pretty much covers how I got involved with Happy Wheels. I was both excited and scared of what kind of reception it would get. A few people said it was the worst game they'd ever seen, while some said it was one of the best games they had ever seen. Overall, I was hopeful, but I didn't know. This game is the result of that experience, and it is my first game in 10 years, so I had a lot to learn about the development process. I feel like the game has improved a lot from the first time I began working on it. The engine has been reworked, the graphics have been reworked, and this time around I tried to go for realistic art instead of just cute art, and I think it came out better. This is a game for anyone who has ever wanted to create something from their own imagination. We want to hear your stories, and the more people we get to play it, the better it will be. So, from all of us at Happy Wheels, thank you for playing it, and we hope you enjoy it as much as we enjoyed making it. . . . f3e1b3768c
