Description: • There is no need to enter any permissions because all required files are included in a single archive. • 16 awesome wallpapers from which to choose (each in 2 sizes: 1920x1080 and 1600x960) • 5 wallpapers made by me (and available as both 16x9 and 16x10 sizes) • A random one wallpaper which you can use for personal pleasure. • The ability to choose the desktop wallpapers •

What's New in the Iceland Theme?

Íslensk Mávabyggð (Iceland Theme) was a small freeware project, created by a Norwegian guy in 1997. I've never seen a free version of this software. This one is the first, released March 18, 2000. Iceland Theme was released under a freeware licence. Installation: To install and run, just run the file. The installation should be as easy as drag and drop. Instructions: 1. You need to have (1) to be able to use themes, (2) to have java and jar on your computer, (3) a icon for this theme on your desktop. Notes: 1. In the desktop menu, you can find 'Create Desktop icon'. This creates a desktop shortcut which can then be opened with: "open" "Windows Explorer" This is very useful if you have set your desktop icon to the desktop shortcut. 2. Due to a windows limitation, themes can only be run on Windows 9x and Windows ME. 3. Iceland Theme is not freeware, but the installer is run in "Freeware" mode, which does not have any activation period. 4. Icelands Theme uses quite a bit of resources and cpu power to run. You should have at least 1Gig of RAM and a CPU which is able to handle the task of running all three parts of Iceland Theme. If your system doesn't meet this criteria, this may be the reason why the desktop does not appear. If you have problems running Icelands Theme, please use the additional resources on the internet to fix your system: Icelands theme Icelands theme is a desktop theme and icon set developed by a Norwegian software developer and released under the freeware license. It can be installed and run on all versions of Windows. Although the program is small, it is very flexible. It is easy to create a custom 'Iceland' desktop wallpaper. This in turn gives you the ability to customize the way you look at your desktop. You can see a preview of some of the ways the program can be customized, on the page . The most recent preview is available on the page . Icelands theme

System Requirements For Iceland Theme:

OS: Microsoft Windows 7/8/10 64-bit Processor: Intel Core i5, i7, AMD FX, AMD Ryzen, Intel Core 2, AMD A8 Desktops: NVIDIA GeForce GTX 560 (or higher) and ATI Radeon HD 5670 or higher. (We recommend GTX1060 or Radeon RX 460) Minimum Resolution: 800x600 VRAM: 1GB Recommended Resolution: 1920x1200 VRAM: 2GB *Windows 10 machine with AMD RX580 graphics or newer may not be supported and you may need to use the Windows 7 or 8
