KeyMacro is a simple and effective tool that allows you to convert one or more audio files from one format to another. It can be used to encode a CD track to a FLAC file or to extract the individual tracks from a FLAC file. The program displays an icon representing the volume of the audio file, which can be a fair indication of the number of tracks in a FLAC file. When you start the application, you will be asked if you want to encode a single song or an entire CD to a FLAC file. In order to do that, you simply need to select the source file, which is the one that will be converted, and click on "Encode". When encoding is complete, you will be asked to enter the name of the new file, an encoding type (PCM, AAC, MP3, WAV, Ogg) and a quality level. Once all the details are entered, the conversion starts automatically. When the encoding process is complete, you will be presented with a final result screen that contains the new FLAC file, in addition to a status bar that displays information about the encoding operation. After the conversion is completed, you can rename the new FLAC file, if you like, or add it to your PC with ease. KEYMACRO comes with a friendly interface and it can be used by any type of user, regardless of their previous experience with computer software. KEYMACRO works smoothly, has no bugs and no crashing. ZIPEDIT Description: ZIPEDIT is a simple and efficient application that allows you to split a ZIP file into several ZIP files. It's a useful tool if you have a large ZIP file and you want to save space on your hard drive. With this tool you can split a ZIP file into several pieces that can then be compressed into a single ZIP file. ZIPEDIT allows you to split files using regular expressions. You simply need to enter a regular expression in the entry box and click on the Split button. After you have selected the file to be split, you will be prompted to enter a name and location for the new ZIP file and then click on the Split button. ZIPEDIT will then create a new ZIP file, which is exactly how you want it. The size of the ZIP file will be the same as the original. You can use ZIPEDIT in two different ways. The first way is to split the ZIP file into several pieces that are then compressed into separate 1d6a3396d6
