AutoCAD LT 2010 and earlier can be used on Windows XP and Windows Vista. macOS: AutoCAD is available as a macOS app. A copy of AutoCAD LT may also be purchased through the application store, allowing users to download it on their Mac. When AutoCAD is installed, CADDiva provides access to licensing information, technical information, and design history. CADDiva is installed by default in AutoCAD LT, and is available for Windows and macOS users. AutoCAD LT can be upgraded to newer versions of the software by paying an upgrade fee, otherwise the application will be replaced by the new version. When AutoCAD LT is upgraded, CADDiva is also upgraded, and when AutoCAD LT is upgraded, CADDiva is automatically upgraded. CADDiva is distributed for a separate fee. Before the year 2000, CADDiva was provided with the installation of AutoCAD LT as an application from the application store on the computer. After the year 2000, CADDiva was available as an option for AutoCAD LT to be installed and used by the user from within the software.
