AutoCAD Full Crack is a computer-aided design (CAD) program that allows users to design and create 2D and 3D drawings. Its native file format is the DWG (Drawing) file. AutoCAD is a product of Autodesk, which produces a range of computer-aided design (CAD) and drafting software that includes titles such as AutoCAD, AutoCAD LT, Revit, Inventor, Vectorworks, and 3ds Max. Although originally developed to work only on Intel-based personal computers, AutoCAD has since been released for a number of other platforms, including x86, ARM, MIPS, and PowerPC. Since 2013, Autodesk has released AutoCAD as a subscription service, offering the software at a low cost of \$8.50 per month. AutoCAD is available as a desktop version and mobile apps for iOS, Android, Windows, and macOS. The web version also offers unlimited cloud storage for the design files.

Features [edit] The simplest approach to using AutoCAD is to use its commands. The commands are controlled through menus and toolbars, and can be executed by pressing the corresponding keys. For this reason, the menus and toolbars are usually the first thing that people view when starting AutoCAD. AutoCAD has two types of commands: Graphical commands Direct commands Graphical commands are used for editing existing drawing objects. Direct commands are used to create a new drawing object. Graphical commands [edit] Each command has its own Help menu to display the help dialog box. A menu bar appears at the top of the screen when a new drawing window is created. Each menu has a button. When the button is selected, the menu corresponding to that button appears. Some menus have more than one button. The number of buttons depends on the type of menu. Edit Menu [edit] This menu allows users to access most of the common drawing functions, such as selection, zooming, toolbars, predefined commands, settings, and tool options. View Menu [edit] This menu contains the tools that are most frequently used in AutoCAD: linetypes, 3D views, and dimensions. Symbol Menu [edit] This menu contains symbols used in the design process, such as line types,

API AutoCAD has an array of APIs for customization and automation. These include AutoLISP, Visual LISP, VBA,.NET, and ObjectARX. ObjectARX is a C++ class library. For Java programmers, there is a Java class library based on ObjectARX that is available to call from Java programs. The following API has been integrated in both Architect and MEP modules: AutoCAD API Library: AutoLISP AutoLISP (AutoCAD Lisp) is a programming language that can be used in AutoCAD for developing applications and customization scripts. It is made for AutoCAD and as a complement to AutoLISP 2D, AutoLISP 3D, and Visual LISP. It is based on the ObjectARX (C++ library). Autodesk Exchange Apps Autodesk Exchange Apps (AEA) is a collection of applications for AutoCAD, AutoCAD LT, and AutoCAD Mechanical. AEA is managed by Autodesk and consists

of applications, graphics, and design-related tools for desktop and web. Add-ons Many add-ons for AutoCAD are available on the software application store, the Autodesk Exchange Apps (AEA). Add-ons can be used for a number of purposes, such as editing parts of the model while continuing to draw on the full canvas, to create your own custom views on the model, or to create very sophisticated workflows, like assembly instructions (edit specific features in a model by dragging them from the document tree), etc. For example, to create an instruction guide for assembling a piece of furniture, you could choose to draw the instructions on the canvas (using an assembly symbol) while drawing on the full canvas, then use the assembly symbol to "grab" and drag specific pieces of the model into the desired positions. Embedding The AutoCAD software may be embedded into web pages. A number of solutions exist to embed the AutoCAD LT and AutoCAD software into web pages. Training and certification AutoCAD has a number of training and certification programs. Education and research As of 2014, there are more than 50 universities that have educational programs in AutoCAD. There is a number of research groups worldwide in Universities and other research institutions, that have a focus on AutoCAD. 5b5f913d15
