AutoCAD is a computer-aided drafting and design (CAD) application developed and marketed by Autodesk. Autodesk acquired the AutoCAD intellectual property from Faber-Castell in 2003. AutoCAD is a complete drafting application that also provides automatic 2D drawing creation and printing capabilities. The latest version of AutoCAD is AutoCAD LT (formerly AutoCAD R13). AutoCAD LT contains the same capabilities as AutoCAD, with a reduced feature set and limited support for third-party software. AutoCAD software is used for design of architectural and engineering drawings. The key benefits of AutoCAD software are speed and simplicity. For example, the application provides features such as parametric drawing, direct sketching, tight and accurate line connectivity, fully controlled drawing processes, and real-time editing of drawings. This type of software is also used for other types of technical drawing, such as mechanical drawings, pipe and piping drawings, and schematic drawings. Some of the most popular CAD software available include: There is also a variant of AutoCAD called AutoCAD R, which was a version of AutoCAD developed by a separate entity. It was later acquired by Autodesk in 2002. Version History Over the years, AutoCAD software was upgraded and released as new features were added. In 2000, the price for AutoCAD LT and AutoCAD R was reduced to \$0, making these AutoCAD variants the most popular computer-aided design (CAD) software for low-cost or DIY users. In 2002, Autodesk released AutoCAD 2004, its first AutoCAD release to include 3D design capabilities. This was also the first version of AutoCAD to be available for the Microsoft Windows operating system. In 2003, the R13 upgrade introduced advanced parameter settings for construction, detailing, engineering, and other use cases. The new release also provided a simplified drawing interface and improved speed. In 2004, Autodesk released AutoCAD LT. AutoCAD LT is designed to work with the same core AutoCAD software that most CAD operators use and share. This allows users to use multiple CAD applications on a single computer at the same time. AutoCAD LT is aimed at the home and hobbyist market, and was developed to compete with the consumer versions of CAD programs.

Lifecycle management The AutoCAD Lifecycle Management feature allows for the creation of lifecycle documentation to support the design/build/delivery process. The deal will see Alibaba deliver 10 Cisco data centres in China and become a provider of services for the global networking giant's cloud products. By becoming the new cloud provider for Cisco's cloud business, Alibaba will be able to offer a full range of services including data centres, cloud services, and managed network services. This will enable Alibaba to offer a similar service model to the likes of Amazon Web Services (AWS) and Rackspace Cloud. Alibaba's main aim is to expand its cloud computing business and build up its cloud computing services to allow for more businesses to take advantage of its cloud computing infrastructure. The cloud computing infrastructure of the future is already here, and while it might not be the cloud computing model you've been thinking of, it's here, it's growing, and it's becoming a bigger part of the way we do business. We look at the market as a whole, and one thing that is clear is that every day people are moving more and more of their services online. As a result, we see cloud computing as a way to deliver on-demand services. This agreement with Cisco is part of the way Alibaba will achieve this, and is expected to start bringing services to market in the first quarter of 2012. One of the major announcements about this deal is that it's bringing Alibaba's cloud

computing infrastructure to the US. This means that Alibaba can deliver its services anywhere in the world, and by doing so it will deliver more value to more customers. By bringing its infrastructure to the US, Alibaba will be able to offer much of the same cloud services that it offers to customers in China and elsewhere. Given that this deal is going to be important to Cisco, and this is such a major move for Alibaba, it's not surprising to see that Cisco is revealing the deal now. For its part, Cisco 5b5f913d15
