Hypertension and chronic kidney disease are well-known comorbidities in the elderly population. However, at-risk group for accelerated hypertension in the elderly, such as those with chronic kidney disease, have not been well investigated. Therefore, this study aimed to develop an accurate prediction model for elevated blood pressure among chronic kidney disease patients. This study included 401 chronic kidney disease patients (mean age 66.4 ± 11.6 years, 56% men). A multivariable logistic regression was used to identify variables which were associated with the presence of elevated blood pressure (≥140/90 mmHg) after adjusting for age, sex, diabetes mellitus, HDL, and hemoglobin. After adjusting for potential risk factors,

A: I'm not sure if your question is answered or not, because you haven't included a screenshot of the expected output. In any case, how about something like this? `fdisk /dev/sdc | grep "hd**" | cut -d" " -f1` If that doesn't work, then copy everything from `fdisk` output and paste it in your terminal and tell me what it says. You don't need to paste the whole line to ask for a serial number, this is why I did `| cut -d" " -f1`. En kvinde blev klippet på sin egen krop, da hun i stedet for at kigge ind på TV'en tog sig at kigge på webkameraer på nettet. - Jeg begyndte at nærme mig de to emsker og lade mig forberede på, hvad der kommer til at ske, siger hun til B.T. Klippet forløb på det åbne løb på Hovedbanegården i København. Gerningsmanden stak en kniv i kroppen på kvinden og klippede hende. - Jeg kan slet ikke nævne, hvad jeg tænkte, da jeg lige begyndte at gøre det. Da kunne jeg ikke stoppe en blodpølse, siger kvinden og tilføjer, at det var først, da hun løb i det åbne område, hvorefter blev hun draget hjem. Gerningsmanden mistænkt for vold Kvinden fortalte det til kollegaer på arbejdspladsen. Derefter ringede hun sin mor, som holdt hende og begav sig til det mørke område i indre Københ d0c515b9f4
