RFE: Brazil Fears for Rainy Season 2014-02-18 09:58 RFE: Brazil Fears for Rainy Season Brazil fears the season could be very rainy, based on the data of the Government's Meteorological Institute (IMD), it says according to the gazette. The IMD has made available its forecasts for the rainy season in Brazil, which takes place between August and October, but the IMD has also noted that many states have been warned for occasional drizzles. There are also some specific reports of flooding in some states, such as Mato Grosso do Sul, Minas Gerais, Paraíba, Pernambuco, Rio de Janeiro, São Paulo and Espírito Santo. The agency has also provided some information about the current weather in the country's biggest cities. In general, we have very high humidity and rainfall, which has not yet finished, but it is expected to be over the national capital, Brasília, until Wednesday. It can, however, be noted that the four days that have fallen so far have not been strong, as we have had to wait for the start of rainy season. Osteoid osteoma of the temporal bone. Osteoid osteoma is a rare benign tumor that is characterized by a radiographically well-circumscribed lesion within bone that is composed of new bone and osteoid. It is commonly observed in the lower leg or foot, with a predilection for the subtalar joint. Osteoid osteoma of the skull base is rare, and reports are limited to maxillary sinusitis, calvarial lesions, and an anterior skull base tumor. We present a case of osteoid osteoma of the cranium in a 30-year-old woman with a history of recurrent episodes of tinnitus that had been refractory to medical therapy. Imaging studies revealed a well-circumscribed, lobulated mass in the left posterior fossa. The tumor was accessed through a left pterional approach. A craniectomy was performed and a defect was intentionally created to enhance the removal of the tumor. The case was diagnosed as osteoid osteoma histologically. Symptoms resolved immediately after the surgery and the patient was free of recurrence at the 1-year follow-up. Osteoid osteoma should be included in the differential diagnosis of craniomastoid lesions.

How to break your startup - vladoh ===== rubypay "Dies is just a story, a made-up story. It's a creative writing exercise. You can use Dies as a way of forcing yourself to write at the keyboard. It's only a 'way', but it's a good way to write fiction." ----- daveschappell I'd like to point out that the title of this article is slightly misleading: there is a whole lot more to breaking than Dies. For more info, check out the book "The Broken Window Theory" by Nicholas Lemann. I've listed some of the more interesting excerpts from the book at this link: ----- daveschappell Other broken window posts are here: ~~~ spencerfry I liked this article a lot, but I think that the first point presented (vs. the second) is more important. "You can have good ideas, but you can't have well-written ideas." By focusing on writing before ideas, the first point seems to better sum up the rest of the article as well. ----- qhoxie Breaking as in throwing it into an open flame. I see this a lot with web apps that don't really get started. I think the points in the article can be accurately applied to software and web startups alike, but the implications are quite different. There was a time, not so long ago, when FHM was not the recognized authority in all things aesthetic. While the magazine may be of little worth today, the iconic beer fridge inside sold by one of its editors, complete with FHM branding on the wall, is nothing short of magnificent. Talk about owning the bar! So it is not surprising that Tash
